

## Elevations / Floor Plans Floor Plan 4

Though small in square footage, this home feels large because of volume ceilings. The expanded ceilings begin in the formal living and dining areas just off the entry. Centered between the formal areas and the casual family room, the L-shaped kitchen features a pantry and eat-in breakfast area. Split-bedroom planning puts the master suite on one side of the home, separate from two family bedrooms. This suite sports a large bath area with a double vanity, separate tub and shower, and huge walk-in closet. The blueprint package includes both elevations.

### Features
