

Elevations / Floor Plans Floor Plan 5

Vaulted ceilings throughout this home suggest the innovative touches that add interest in a one-story plan. Sidelight and overhead windows brighten a foyer that opens to the family room and living room. A plant shelf spans the entry into the living room, which is united with the dining room under a high ceiling. A vaulted ceiling also augments the family room. Notice the two-way fireplace and access to a covered patio here. The kitchen is convenient to the dining room and to a bayed breakfast nook. The master bedroom also has a bay window plus a full bath with oversized shower. Two additional bedrooms share a full bath. Plans include two different elevation choices!

Features
